PROFILE

Full Stack Developer specializing in MERN stack and AI-driven applications, with hands-on experience in building scalable, high-performance web platforms. Experienced in developing financial and data-driven systems, including intelligent AI-powered applications. Strong expertise in RESTful APIs, cloud deployment (AWS), and system design. Passionate about building interactive, user-centric applications, including fintech platforms.

EXPERIENCE

Virtual Intern – SkillWallet (AI & Cloud Internship)

Movie Ticket Booking System (Cloud-Based Full Stack Application) *Dec 2024 – Feb 2025*

Github Link:- <https://github.com/Siddique-Shayan/Cinebooker>

- Developed and deployed a full-stack ticket booking system.
 - Designed scalable backend services handling user management and transactions.
 - Deployed application on AWS EC2 ensuring high availability.
 - Used Amazon DynamoDB for scalable NoSQL data storage.
 - Integrated Amazon SNS for real-time notifications and confirmations.
 - Designed cloud architecture focusing on scalability and low latency.
-

FREELANCE EXPERIENCE

Frontend Developer – Production House Management System

June 2024

- Designed responsive UI/UX workflows using Figma.
- Developed responsive frontend interfaces using React.js.
- Improved operational efficiency through optimized dashboard and workflow design.
- Collaborated with project stakeholders for feature integration and usability improvements.
- Integrated frontend components with backend APIs for seamless real-time data handling.
- Optimized application responsiveness and reduced UI rendering delays for improved user experience.

PROJECTS

TaxBae – AI-Powered Financial Assistant (FinTech Application)

2025 – Present

Github Link :- <https://github.com/Siddique-Shayan/TaxBae>

- Developed an AI-powered financial assistant enabling intelligent tax and financial decision-making.
- Built scalable backend services using Node.js and Express.js with optimized REST APIs.
- Integrated AI-powered chatbots using LLM workflows for personalized financial assistance and conversational support.
- Implemented Generative AI, OpenAI APIs, and RAG pipelines for context-aware financial insights.
- Designed secure JWT-based authentication and authorization workflows.
- Structured scalable backend architecture focusing on performance, modularity, and maintainability.
- Applied prompt engineering techniques to improve AI response quality and accuracy.
- Optimized API performance and backend response handling for real-time financial interactions.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++

Frontend: React.js, Tailwind CSS

Backend: Node.js, Express.js

Databases: MongoDB, PostgreSQL

Cloud & DevOps: AWS (EC2, DynamoDB, SNS), Basic CI/CD, Docker (Fundamentals)

Concepts: REST APIs, System Design, Scalable Architecture, DSA

AI & Data: Generative AI, RAG Pipelines, Prompt Engineering

Tools: Git, GitHub, Figma

EDUCATION

Bachelor of Engineering (Computer Engineering)

M.H. Saboo Siddik College of Engineering, Mumbai

2022 – 2026

CGPA: 7.95

CERTIFICATIONS

- Generative AI – AWS
- MERN Stack Development – Udemy
- PostgreSQL/SQL – Oracle
